

Teaching as Mentoring in the 21st Century

Saturday, 27 July 2024 15:55 (1 hour)

Mentorship is a developmental relationship in which a more experienced person helps and supports the less experienced one to reach specific goals. Why teachers as mentors? This workshop will point out the effectiveness and benefits of Teachers as Mentors in English language teaching by helping teachers to dig out their potential by not just only teaching but also being teachers as mentors to change from routine/traditional ways of teaching to new effective practical methods in teaching English in the 21st Century contexts. For instance, Skill-based Active Learning through advice, leadership, guidance, coaching, scaffolding, and inductive approach. Moreover, with practical solutions, the workshop will pick up common issues in the traditional classroom. Participants are expected to be aware of mentors' roles and able to mentor their students after joining this session. There will be two practical activities related to the Teachers as Mentors for the participants to practice.
