# Engaging Students and Exploiting the Power of AI in English Language Teaching

*Saturday, 27 July 2024 15:55 (1 hour)*

The emergence of Artificial Intelligence (AI) has revolutionized various sectors, and education is no exception. As AI technology continues to evolve, its potential to enhance student engagement and learning outcomes in English Language Teaching (ELT) becomes increasingly evident. Traditionally, maintaining student motivation can be challenging. However, AI offers a range of tools and applications that can address these challenges and create a more dynamic and interactive learning environment. Driven by recent advancements in AI, this presentation explores its potential to enhance student engagement and learning outcomes in ELT. We will discuss the challenges of maintaining student motivation and engagement and highlight how AI can address these challenges. The presentation will introduce a selection of practical AI tools, which offer interactive activities and personalized learning experiences, that teachers can integrate into their classrooms. These tools will encompass areas such as vocabulary building, grammar practice, and pronunciation. Real-world examples and hands-on activities will be provided to demonstrate the effectiveness of AI in promoting learner motivation and fostering a more engaging English language learning experience.
