

Using Canva App to Enhance Speaking Skill for Ha Thuong Primary Pupils

Saturday, 27 July 2024 15:00 (45 minutes)

Hà Thượng is a mountainous commune of Đại Từ District, Thái Nguyên Province. Hence, ethnic minority pupils lack of English speaking environment. Canva App helps them to have a chance to enlarge their speaking skill when they talk with AI Presenters via D-ID AI Presenters being connected with Canva App. Teachers have explored advantages of Canva as an online teaching tool which helps them to convert text to speech as well as picking a presenter or uploading your own, adding your text and our plug-in will generate an AI presenter in moments. The aim of the research is to find out the effectiveness of applying Canva App to improve speaking skill for primary pupils. The study was conducted in the second semester among 30 fifth-graders at Hà Thượng Primary School in Ha Thuong Commune, Dai Tu District, Thai Nguyen Province. The results were obtained from the teacher's observation and a questionnaire which participants were asked to fill in after 5 months. The study indicates that applying Canva App is necessary for teaching speaking skill because of encouraging pupils to speaking more English fluently and naturally.
